

Title of Document:	Request for Change	Issue No. G21-07556	Rev. 0
Customer:		Issue date: November 8, 2021	
Title subject:	XA connector SMT type: Addition of housing resin material	Revision date:	

Please take note that we would like to add a resin material used for the housing of XA connector SMT type due to the supply restrictions by current manufacturer as follows.

1. Target product and Part Number

Series	Part number
XA connector SMT type	BM**B-XASS-TF (LF)(SN) BM**B-XASS-GW-TF (LF)(SN)

2. Timing of implementation

Production will start after December 2021.

3. Contents

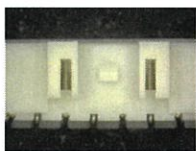

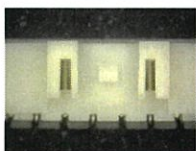

Regarding the housing resin material for the aforementioned subject products, the materials that are involved in the material change from PA6T to PA4T will be added.

The color is slightly yellowish, but this does not affect the performance.

Please refer to the test report (R21-0859) for the evaluation result.

As for the additional products (made of additional resin), "(4T)" as identification symbol to indicate material change shall be suffixed to the current part number.

We will be applying for UL/CSA certification of the additional products in turn.

		Resin material manufacturer	Resin Model No.	Part No.
Current product		DuPont	PA6T	BM**B-XASS-TF (LF)(SN) BM**B-XASS-GW-TF (LF)(SN)
Additional product		DSM Japan Engineering Materials K.K.	PA4T	BM**B-XASS-TF(4T) (LF)(SN) BM**B-XASS-GW-TF(4T) (LF)(SN)

4. Reason for the change

In order to meet the delivery date by substituting to the alternative materials from the current housing materials that are continuously restricted, this addition shall be conducted.

Your thought understanding and consideration would be very much appreciated.

-End-
